

Heimgard

Entry Lock

Smart Lock Series

Keyless, Connected & Secure

Entry Lock

Product Overview

The Heimgard Entry Smart Lock is a Scandinavian-designed smart door lock that gives you modern, keyless access with reliability, security, and ease of use. Built for Nordic doors and conditions, it installs easily and fits seamlessly into your everyday life.

Unlike many other smart locks, the Heimgard Entry Lock comes with a Zigbee 3.0 module already built in. There's no need to purchase or install any separate add-on modules. Out of the box, it connects directly to your Heimgard Hub, and can also be paired with other major Zigbee-based platforms like Homey, Home Assistant, SmartThings, and ABRA.

Whether you're managing family access, securing a cabin, or renting out a property, the Entry Lock provides flexible access with PIN codes, RFID tags, app control, or an emergency key backup. The integrated auto-lock function ensures your door locks itself automatically after closing, giving you peace of mind at all times.

Key Features & Benefits

- Keyless Access – Unlock with PIN, RFID tag, or the Heimgard app
- Future Ready - Already includes a Zigbee 3.0 module, no need to buy separately.
- Smart App Control – Lock/unlock, receive alerts, manage users remotely. (hub required)
- Auto Lock – Locks automatically after closing (default 5 sec, adjustable)
- Anti-Peep PIN – Enter random digits before/after your real PIN
- Emergency Override Key – Always accessible in case of power loss
- User Management – Add/remove up to 39 PINs and RFID tags
- Secure & Durable – IP65-rated exterior; designed for harsh Nordic weather
- Easy Installation – Fits most Scandinavian mortise lock doors
- Battery Powered – Long life (up to 12 months); alerts when low
